

## CACTUS CHRONICLES.

Another Interesting Letter  
From the Bazoos Mexico  
Correspondent.The Extensive and Valuable  
Iron Productions of  
Durango.The Great Wealth Which Lies at  
Our Door Awaiting Devel-  
opment.

Special Correspondence of the Bazoos.

CITY OF DURANGO, March 16.

The opening of the domain of Mexico by railroads is bringing within her borders the energetic mechanics and manufacturers of the United States.

These men come with

## CAPITAL AND KNOWLEDGE

to operate and turn into goods of all kinds, our immense deposits of iron, tin, timber, cotton, silver, and various other resources. The Iron Mountain company at the City of Durango are the first of their line in manufacture of any importance in the whole republic. They are men of the highest order of their class, and they bring with them a perfect knowledge of their business, and capital to carry out their plans of making an iron business second to none in the world. Having an unlimited supply of the best ore known or yet discovered, already mined to their hands; having only to shovel it into their furnaces; also a thirty-mile tract of land which embraces

THE GREAT CERRO DE MERCADO, the iron mountain of the world; the river Murgu running through and close to the works; abundant supplies of fuel, lime, sand, rock, timber, and everything else needed by them in their enterprise; located in the very heart of the republic, and the center of the great belt of mines of fabulous wealth of silver, gold, and other precious metals; a country bounding in all kinds of agricultural products, which are produced very cheaply in a thickly settled part of Durango, where can be obtained any amount needed of the better quality of labor, at a price which seems to Americans marvellously low, living costing them very small sum compared to what it does in the states that they gladly hail the chance of getting fifty cents a day, and being strong, hardy, and quick imitators of our people in doing work, they are a class of workmen who will prove very advantageous to the company.

A CLIMATE OF SUCH SALUBRITY that it is a pleasure even to breathe the pure air and bask in all the healthful, invigorating breezes which such an altitude can give. The company have, in addition to all this, an unlimited market at their very doors. Three railroads are extending their lines to the City of Durango, which will give them access to a very great area of Mexico, hitherto only accessible by pack animals. The prices to be obtained seem to all iron dealers in the state a fortune for even a very reasonable production. Nails and spikes, 30 cents per pound; rough castings from twelve to sixteen cents, are a few of the articles and prices which await this company and for which the demand is great and increasing every day.

THE CITY OF DURANGO containing 30,000 people is wanting pipes for their water works; a theatre wants 2,000 iron opera chairs, the tin mines of the "Cerro de Remedios" want sheet iron to make tin plate. The government is offering a bonus of \$100,000 for the first steel rail mill, and the mines in the vicinity are needing large quantities of all kinds of iron manufacture, which some few of them are importing from the states, but the freight and duties are so heavy that it sets almost as an embargo upon the trade. In a very short time the company will be manufacturing, as they have one blast furnace in operation and have built a foundry and machine shop 100x200 feet of solid stone walls, three feet thick, and two other blast furnaces are now being rapidly pushed forward to completion.

The foundation for the rolling mill and other building are all coming forward and will soon be pouring out their goods in large quantities.

There probably never was known a company

WITH SUCH UNEXAMPLIFIED FACILITIES, with such a market and at such prices are now ready for them. An experienced iron manufacturer and engineer says he could sell the "Cerro de Mercado" if it was in Pennsylvania for \$40,000,000 and that it is worth forty times as much where it is.

The men who originated and are carrying out the plans are men of the highest repute for integrity and honor. They are not making it a passing scheme, but are building for the future and must make it an unparalleled success in the history of iron manufacturing.

Our next letter will treat of the valuable woods, their uses value and extent.

## Our Taxable Wealth.

Jefferson City Tribune.

Below we give the aggregate of the assessment of 1883 for the taxes of 1884, as shown by the books of the state board of equalization. The valuation of the railroad, bridge and telegraph property, to be assessed in April, is not included:

Land.....	\$248,570,669
Town lots.....	243,918,669
Horses.....	2,900,482
Mules.....	9,582,644
Asses and jennets.....	244,123
Cattle.....	25,910,468
Sheep.....	1,842,116
Hogs.....	6,296,232
All other live stock.....	190,921
Money, notes and bonds.....	58,759,192
Brokers and exchange dealers.....	2,288,115
Corporate companies.....	12,855,110
All other personal property.....	42,248,663

Total valuation of real estate.....\$492,487,338

Total valuation of personal property.....187,338,066

Total valuation.....\$679,825,404

THAT HACKING COUGH can be so quickly cured by Shiloh's cure. Sold by Bard & Miller.

A Remarkable Mishap  
Special to the Bazoos.

PARIS, Mo., March 26.

One of the most singular escapes from death ever recorded occurred in this vicinity to-day.

This morning a Mrs. James, living near this place, after doing her house work concluded to pay a visit to a neighbor living some two miles distant, and for that purpose had a large horse belonging to her husband saddled. Mounting the animal, she took her babe some eighteen months of age in her arms, and a little daughter some three years old behind her, and started on her journey. After going some distance, the roads being very muddy, the horse became stuck, and floundering, fell upon his side, precipitating the riders to the ground. In the fall Mrs. James lost hold of her child, and leaping to her feet found it had disappeared. Her screams brought some neighbors, whose united efforts soon raised the horse, and beneath where he had lain was discovered the babe crushed in the mud, and although some two or three minutes elapsed before it was rescued from its terrible immersion, it was found not to have been seriously injured.

## A DESPERADO DOWNED.

## Arrest at Tipton of a Notorious Criminal Wanted for Several Offenses.

Special to the Bazoos.

Tipton, Mo., March 25.—There was considerable excitement upon our streets yesterday over the arrest of a man named Anderson. He filled up pretty freely with burgundy and displayed plenty of money. He was placed in the lock-up last night by Marshal Clark. When the marshal next visited the cooler he found that Anderson had pulled the door of the calaboose off its hinges, and was ready to walk out. He offered the marshal \$200 to let him go. Anderson was raised in Cooper county and has a bad record. It is believed he killed Thomas S. Cockrell, some years ago in Saline county, as circumstantial evidence points directly to him as the murderer.

A telegram from the marshal of Wyandotte, Kansas, was received this morning asking our marshal to hold Anderson until his arrival to-night. Too much credit cannot be given Marshal Clark for the manner in which he has handled this noted desperado.

Ely's Cream Balm cured me of catarrh of many years standing—restored my sense of smell. For colds in the head it works like magic.—E. H. Sherwood, National State Bank, Elizabeth, N. J. (Easy to use. See adv.)

For several years I was troubled with catarrh, have tried many remedies. Ely's Cream Balm has proved the article desired. I believe it is the only cure.—L. B. Coburn, Hardware Merchant, Towanda, Pa. (See adv.)

I had suffered from Catarrh for ten years; the pain would be so severe that I was obliged to send for a doctor. I had entirely lost sense of smell. Ely's Cream Balm has worked a miracle.—C. S. Halley, Birmingham, N. Y.

Ely's cream balm has cured me of Catarrh. Was afflicted ten years. I tried almost every remedy recommended, none proved so effective and thorough.—S. K. Aiken, wholesaler of shoes, 143 Federal street, Boston, Mass.

## SCHELL CITY SCANDAL.

John Collier Held in \$10,000  
Bond to Answer to the  
Charge of Big-  
amy.

Special to the Bazoos.

SCHELL CITY, March 25.

On last Friday City Marshal Miller arrested John Collier, of hog notoriety at Clinton, Mo., on a warrant sworn out before Justice Herrick, of Schell City, on the charge of abandonment. Having no safe place to keep he was compelled to pass Friday night in the county jail at Nevada, and was brought back Saturday. He waived examination and gave bond in the sum of \$10,000 for his appearance at Nevada on March 26th, for trial.

He was re-arrested on Saturday, the charge this time being adultery, and again gave bond in the sum of \$1,000 for his appearance at Nevada for trial on Wednesday, March 28th. The facts in the case are as follows:

The family of John Collier consisted of himself, wife and Sarah Patton, a woman who has lived with them for about four years past until lately. It now appears that Collier has been trying to make a moratorium of himself by living with two women at the same time, and in the same house, and has been doing so for over three years, keeping his wife from making any complaint by threats of shooting her. He furnished the Patton woman with a revolver, and told her to kill Mrs. Collier if she interfered with her in any way.

About three months ago it was discovered that Collier and the Patton woman were having clandestine meetings at the yard back of the house.

They met once or twice, however, and were caught by the neighbors, who took the matter in hand and gave them twelve hours in which to leave town. They took advantage of this and went to Clinton, Mo., where they have been living ever since.

Mrs. Collier is still in Schell City. She has the sympathy of the entire community.

Died,  
At her residence in this city, Monday night, at 8:30 o'clock, Mrs. Johannah Callahan, aged 63 years. Mrs. Johannah Callahan came to this city twenty-three years ago. She was a consistent member of the Catholic church. She leaves four daughters to mourn her loss.

## A Fair Offer.

The Voltaic Belt Co., of Marshall, Michigan, offer to send Dr. Dye's celebrated Voltaic belt and Electric Appliances on trial for thirty days, to men, old and young, afflicted with nervous debility, lost vitality and many other diseases.

See advertisement in this paper.

## ANOTHER FIRE IN THE PEN

Causes Some Alarm, but is  
Extinguished Before Much  
Damage is Done.The Election of Delegates to  
the County Republican  
ConventionThe Governor Refuses to Con-  
vene the Legislature in  
Special Session.

Special to the Bazoos.

JEFFERSON CITY, March 27.

An alarm of fire was sounded at the penitentiary this afternoon at 2 p. m. The alarm was occasioned by the roof of the building used as a blacksmith shop, catching fire from a defective flue. The fire was extinguished with a few buckets of water, and the loss is trifling.

The republicans of Jefferson township met at the county court house in mass meeting this evening and selected thirteen delegates to the county convention, which meets in this city on the 29th inst. The meeting was harmonious, and of the thirteen delegates eleven are half-breeds, one doubtful and one a Filleyite.

In reply to a letter received from Mr. John J. Cockrell, of Warrensburg, a son of Senator Cockrell, and agent for a loan company, in which Mr. Cockrell requested the governor to convene the general assembly in extra session, to legislate on the laws relating to foreign loan companies doing business in this state. The governor reviews the decision of Judge Phillips in the case of Long vs. Long, and also the concurring opinions of other members of the supreme court. He also reviews the action of the court in denying a rehearing in the case and reasons that there is no necessity whatever for an extra session of the legislature, as the action of the court does not in any respect interfere with one dollar of capital legally invested by foreign loan companies in Missouri. He further says that a great deal of the clamor raised is caused for political purposes, and there is no necessity whatever for any alarm regarding either the state or her citizens repudiating any honest debt.

## PILOT GROVE PILLAGERS.

A Bold Attempt at Burglary  
Frustrated by a Brave  
Boy's Bullet.Maddox' Missile Plays Havoc  
With a Burglar's Arm and  
Leads to a Capture.

Special to the Bazoos.

PILOT GROVE, March 27.

About 3:30 o'clock this morning an attempt was made by two youthful tramps to burglarize the general merchandise store of J. T. Ellis & Co., at this place, which ended in the wounding of one of the thieves and the capture of both.

At the hour named Ed Maddox, aged 14 years, a clerk in the store, who in company with E. H. Harris and Thos. M. Roberts, sleeps in the store was awakened by

A NOISE AT THE BACK DOOR.  
Rousing his companions, young Maddox informed them some one was endeavoring to break into the ware room. The noise continuing, Maddox armed himself with a large navy revolver and slipped noiselessly into the ware house, his companions being prepared to render assistance if necessary. A moment later

THE SHARP REPORT OF A REVOLVER rang out in the darkness and a smothered cry of agony followed by hastily retreating footsteps, was heard. The noise of the report awakened some of the neighbors and in a very few minutes quite a crowd collected, to whom the excited boys, who by this time had come out of the front door, stated burglars had tried to enter the back door and they had shot at them. An investigation showed this to be true, as the back door near the lock was cut with a knife, which was found some four feet from the scene of operations. Nothing could be done, however, until daylight, when further investigation showed

A TRAIL OF BLOOD,  
leading towards the railroad and in the direction of Pleasant Green. A posse was hastily summoned, and headed by H. M. Ellis, started in pursuit. On the way the shoes of the burglars, which they doubtless untied preparatory to entering the store, were found stuck in the mud and the blood trail continued some half a mile. Satisfied that they had gone to Pleasant Green, Mr. Ellis boarded the local freight and succeeded in overhauling them at that point. They were brought back to Pilot Grove, where they fully confessed to the attempted burglary, but declined to give their names and all that could be learned from them was that they were tramps and had come from Collinsville, Ill. They are mere boys, being brothers and aged respectively 14 and 19 years. Examination showed the youngest one to be

SHOT IN THE LEFT ARM,  
the ball having entered at the hand, passed through the flesh to the elbow, and thence through his coat, lodging in his vest close to the heart. It was a close call, and he expressed himself as thoroughly cured of all taste for the life of a burglar. Later in the day the prisoners were taken to Boonville and lodged in jail on a warrant charging them with house breaking and attempted burglary.

Dr. Frazier's Root Bitters.  
Frazier's Root Bitters are not a dram shop beverage, but are strictly medicinal in every sense. They act strongly upon the Liver and Kidneys, keep the bowels open and regular, make the weak strong, heal the lungs, build up the nerves and cleanse the blood and system of every impurity. Sold by R. B. Hostettler. \$1.00.

## FOR OUR FARMER FRIENDS.

## Coal Oil Barrels For Sorghum.

Coal oil barrels are said to be the best for sorghum syrup.

Hard or dry earth is the best disinfectant and absorbent.

If it is desired to clean barrels for immediate use, take a can of concentrated lye in six gallons of water, pour into the barrel close the bung, run a thoroughly by frequent shakings, allowing the liquid to remain one day in the barrel then rinse the barrel thoroughly with boiling water.

If you have a steam engine it can be cleaned rapidly by boring a hole in the head and admitting steam through the bung for half an hour.

## THE SUGAR INDUSTRY.

Should congress determine, in its wisdom, to reduce or to abolish the duties on imported sugars, it should most certainly provide a bounty on sugars and syrups of home production. These infant and struggling industries are worthy of protection. A large sugar production within our own boundaries would also be a source of independence in case of foreign war.

Under large government bounty in Germany, both beet culture and beet-sugar factories have increased rapidly. Notwithstanding an apparent overproduction in beet-sugar in Germany, yet ninety new factories are under construction. What a pity our American farmers do not attempt to raise, either from beets or sorghum, the \$1000,000,000 worth of sugar consumed annually in this country.

## MINOR MENTION.

Silo building for ensilage is growing very popular.

Leghorn chickens are said to be the best layers.

The fruit crop in Missouri is said to be injured 75 per cent, by the severe winter.

The yield and quality of wool is greatly increased by the proper housing of sheep during winter.

Green fallowing is the best manure, any green crop turned well under is good, but clover is the best.

Poultry should have green feed all the year. For winter use turnip bits. Carrots, onions and cabbage may be used. Late cured hay and fodder leaves are also good. Any of the above should be chopped fine for use.

## VALUE OF UNITED STATES FARMS.

The farms of the United States are worth \$10,187,000,000, while all other real estate, including the dwellings and warehouses of the city, the capital employed in the business, and the water-power besides, is but \$9,881,000,000; railroads and their equipments are worth but \$5,536,000; and mines, including petroleum wells, gold and silver bonanzas, and stone and other quarries, are worth but \$780,000,000. To the \$10,000,000 invested in farming lands, New Jersey contributes the most valuable land; for while the average acre of the United States is worth but \$19.02, the New Jersey acre is worth \$65.15.

## FRANCE AGRICULTURE.

About one-half of the population of France lives by agriculture, upwards of 9,000,000 of which people own and cultivate their land, while 3,000,000 of these proprietors possess lots too small to furnish a living, hence work occasionally as laborers on the land of others. There are 500,000 farm servants.

## COMPETITION AND FREIGHT TARIFF.

Excessive railway competition is giving the grain shippers from Chicago to the seaboard the extraordinarily low winter rate of twenty cents a hundred pounds on grain. There are eight roads fighting for the business which five carried in 1880. In busy years the railroads have heretofore demanded thirty to thirty-five cents per 100 pounds on grain, winter delivery. Such a reduction should help our export trade.

## THE GERMAN HOP CROP.

The hop crop of the German empire in 1883 was a middle one, estimated at about 42,600,000 pounds or an average of 427 pounds to the acre.

All Europe produced 4,041,778,000 gallons of beer in 1883, of which Germany and England, nearly equal in amounts, manufactured nearly one-half. In Germany the average annual consumption of beer per head of population is 134.40 quarts; in England, 125.10 quarts; in Belgium 163.25 quarts; in all Europe about twenty quarts per head. In 1883 this country produced 376,775 gallons of beer.

## RAILROADS.

Railway construction is nearly at a standstill. In '83 these were completed only 6608 miles of railroad, against 11,531 miles in the previous year.

We note an unusual development of the railway system in the northern states between the Hudson and Mississippi rivers, which might result eventually, in lower rates of freight on

agricultural produce bound to the seaboard.

## OAT STRAW FOR HORSES.

Oat straw is generally preferred to any other for feeding horses, though analysis shows it less nutritive than wheat. Barley straw is objectionable for most kinds of stock, on account of its rough beards. It is probable that the softer texture of oat induces animals the more readily to eat it.

## A USEFUL VARNISH.

An excellent varnish for hanging basket, or for leather work, is made of half a pound of asphaltum in one pint of turpentine. Let it stand over night before using. Card-receivers, and watch cases can be made of butternut shells, and varnished with this preparation. It is useful also for cones and acorns.

## NAMING FRUITS.

The names of fruits should receive more attention. Evident confusion is caused by the existence of great numbers of local and trivial names applied. For instance, one standard, sensible name should be applied to each variety, and all other names should be discarded. Other things being equal, the oldest name should stand. We may hope for much clearness and perspicuity in nomenclature to result from the work of the American Pomological society in this direction. The Michigan Horticultural society, at its fairs, has had a competent person name the fruits exhibited, not in the interests of competitors, but for the purpose of educating people to know fruits by their correct names.

## THE CHEESE INDUSTRY.

The stock of cheese on hand Jan. 1, 1884, was 146,059 boxes at New York, 184,500 at all of her American and Canadian centres, 115,500 at Liverpool, and 70,000 boxes at London. This shows a slight falling off in the aggregate American stocks and a slight decrease at English ports.

## IMPORTED CABBAGE.

Imported German cabbages are very popular in New York this winter. They are superior in size and flavor to the native cabbages, with heads more solid also. The foreign cabbages command double the price of American specimens.

## ODDS AND ENDS.

A young mother, traveling with her infant child, writes the following letter to her husband at home: We are all doing first rate and enjoying ourselves very much. We are in fine health. The boy can crawl about on all fours. Hoping that the same be said of you, I remain, etc, Fauny.

That lady is handsome, but she looks as if she had a temper of her own, remarked one drummer to another on a train the other day. You read character correctly, was the reply. Why, you speak as if you were acquainted with her! Well I am, slightly. I married her some ten years ago.

A writer in a scientific monthly asks: What is a meter? In reply a jocular editor said: An opinion prevailed that a meter is a contrivance that works twenty-seven hours a day, eight days a week the year round, and when you resolve to economize in the use of gas, it throws in a couple of extra hours daily without charge.

I declare, it's real mean! exclaimed Miss Stageluck, upon taking a second look at the bouquet which had just been passed up from the orchestra. They are artificial. The prompter thought to mollify her by suggesting that they were quite as natural as her acting; but judging from the look she gave him, his attempt was a dismal failure.

## As When She Was Young.

"I have used Parker's Hair Balsam and like it better than any similar preparation I know of," writes Mrs. Ellen Perry, wife of Rev. P. Perry, of Coldbrook Springs, Mass. "My hair was almost entirely gray, but a dollar bottle of the Balsam has restored the softness, and the brown color it had when I was young—not a single gray hair left. Since I began applying the Balsam my hair has stopped falling out, and I find that it is a perfectly harmless and agreeable dressing."

—Malaria positively cured with Emory's Standard Cure Pills, a never failing remedy; purely vegetable, contain no quinine, sugar coated—25 cents.

## H. Febr.

Is manufacturing wagons at Geo. Scheer's old stand on St. Louis street, and has on hand several which Mr. Scheer ironed. Mr. Febr has a first-class repair shop for buggies, wagons, &c., and will sell his wagons at low prices and warrant them as good as any ever made or sold in the city.

12-25-w6m

## High Grade Cattle.

I have one car load of high grade short horn bulls and heifers, from ten to eighteen months old, for sale at my Walnut Grove farm, Monticue county, Mo.

2-26w2m\*

J. A. LANDER.

—Pure White Norway oats for sale at Norton & Norton's. 3-25w3t.

## Field and Garden Seeds.

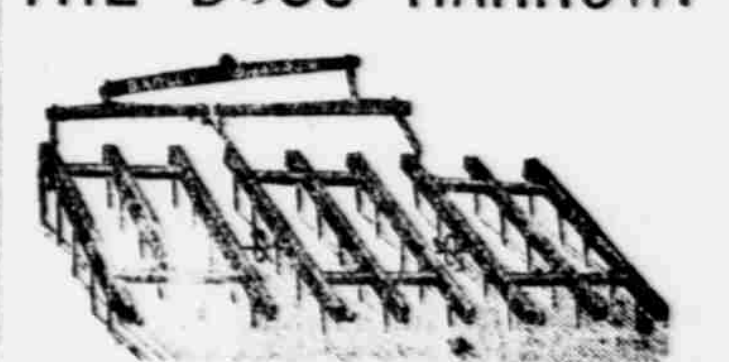

All kinds of field and garden seeds, pure and fresh, at J. W. Kalfus' 304 and 306 West Main street, Sedalia, Mo. 2-5w12t

This is miserable weather, a man growled leaning against a lamp-post. I think it's beautiful, replied an acquaintance. The sun has shone every day for a week, and the air is dry and pleasant. That's all very well, said the growler, but you know I am a coal dealer. Why, no longer ago than a couple of months I heard you growl because it was so cool. Yes, but you know I was in the ice business then.

—Emory's Little Cathartic Pills are sufficiently powerful for the most robust, yet the safest for children and weak constitutions.—15 cents.

—For seven years Allen's Brain Food has stood the strongest tests as to its merits in curing nervousness, nervous debility, and restoring lost powers to the weakened generative system, and, in no instance, has it ever failed; test it, \$1; 6 for \$5.—At druggists, or by mail from J. H. Allen, 315 First Ave. New York City.

## THE BOSS HARROW.

The most perfect adjustable and reversible teeth vibrating and self-sharpening smoothing Harrows made.

It is the only harrow that each section has a direct endways or vibrating movement.

It is the only harrow having a jointed or flexible doubletree and that either section will not hold up the other while harrowing over low places.

It is the only harrow that round, square or diamond teeth can be used, interchangeably in the same harrow.

It pulverizes prairie and blue grass perfectly.

It is self-sharpening; the teeth can be turned round when worn on one side, and the doubletree prevents the forepart from rising up while in operation.

It will not clog or drag trash but bury it so deep that in drilling your wheel your drill will be exempt from trash.

It is painted BLUE. Ask the undersigned for the

## BOSS HARROW.

painted blue, and take no other.

This year we are manufacturing four kinds of smoothing harrows, one of which is entirely of iron and steel. We also manufacture plows, hay rakes, rakes, field-rollers, broom corn cleaners, horse power wood saws, etc.

Prices low. Send for catalogue.
